ANAIS & BOWIE

MATERIALS

- 30x30 Paper Pad CBPM058
- 8 acetate sheets A4 size
- 1 acrylic paper A4, 1 mm
- Paper glue
- Cotton ribbon
(2 different colors,
about 30 cm each)
- 4 eyelet

1

Cut the acrylic and acetate tags. The acrylic material can substitute with the acetate. In this project 2 changes for each character have been created, so 2 acrylic tags for the characters and 8 acetate tags (2 for each clothes change) (image A)

2

Cover all the tags with scrapbooking paper. Try using a whole paper item or a tag made of acrylic material; instead of the acetate tag it is possible to use some paper stripes (13.5x2 cm -2; 4.4x2 cm -2; 5x2 cm -1.8; 8x2 cm -1); in this way the use of the paper is optimised. (image B).

3 Create the pockets. Cut 2 paper elements for each central tags. Paste it leaving in the upper side the hole of the pocket. The upper side of the frame of the tag, which you can paste from the scrapbooking paper, is a little bigger than the base (base: 1 cm; upper part 1.3 cm). Leave 3 mm in the lower part and on the edges for the pocket thickness. The locks will be 1 cm (image c). Create 2 pockets for each acrylic tag.

4

Paste the little girl and the boy on the tag, making the front and the rear part corresponding. Start glue the clothes on the other tags. In order to do this, insert the tag in the pocket and, when it is well arranged, paste the clothes respecting the child position.

5

Prepare two holes, then insert the eyelets and the ribbon in each acrylic tag. Important: do not use too much glue in order not to get the acrylic or the acetate bas dirty. Otherwise clean it very well with a cotton tissue.
