WINTER LANTERN

MATERIALS

- 30x30 Pattern Pad CBT056
- Cardboard 2 mm, A4 size
- Paper glue
- Brads, metallic lock
- Lace
- White tissue paper or with winter decorations, 1 paper A4

r 1,5 cm

h 2,5 cm

1

Cut the cardboard as indicate: 4 bigger trapezoids for the 4 four faces of the lantern; 1 smaller (take the inner part of the bigger trapezoid and subtract each side of 1 mm about when cutting).

Cut the scrapbooking paper trapezoids to cover the cardboard, leaving on each side 1 cm more than cardboard size. Cut the cardboard rectangles, 7 in total.

2

Glue the scrapbooking paper around the cut cardboard elements. I used the wall background, but you can choose following your creativity.

3

Insert the lock mechanism with the brads. This one will be the door.

4

Cut the tissue paper trapezoids, glue them in the inside the doors, creating the glass in this way. Hide the borders of the tissue paper inside the door with some scrapbooking paper, which must be the same size of it.

5

Cover the 7 seven rectangles, previously cut, with scrapbooking paper.

6

Create the roof. For the inner part of it, glue together the 10.5x10.5 cm item with 4 little elements. For the outer part glue together 6.5x6.5 cm item and 5.5x5.5 cm item.

7

Glue all the items of the lantern together. Start from the sides: using 4 scrapbooking stripes in the inner part pasting them in each angle. In the same way, join the base with the part below and the roof, always using 4 scrapbooking stripes for the background and 4 more for the roof.

8

Create the decorative item for the roof. With a stripe of scrapbooking paper create a little tube of 2.5 cm high and about 3 cm diameter. Create a little cone of 3 cm of radius. Stick all together and put it on the roof. Decorate the part below with a lace ribbon.

9

Decorate the lantern with the cut elements.
